

WORKING IN THE MATADOR LODGES

„WHEN FASHION TURNS INTO SPACE“

Long time ago, a fashion brand was born that became a decade later the world famous: Windsurfing Chiemsee. The creative mind behind it: Martin Imdahl, owner and project initiator of the Matador Lodges. Just like many of his colleagues, Martin unfolded his talent in terms of shapes and design far beyond fashion itself and therefore shops, book projects, collaboration with artists, furniture and as far as a horse breeding in Andalusia, his second home, came into being. A few years ago, Martin developed the idea of Matador Lodges. The boutique hotel offers design and formal aesthetics in natural surroundings in the Chiemgau region, a retreat of clear forms, skillful proportions and natural materials.
